

Flint – a format and file validation tool

Alecs Geuder

SCAPE Information Day

British Library, UK, 14th July 2014

Introducing Flint: Presentation Structure

- Introduction
- What does Flint do?
 - Flint-the-API
 - Policy-focused Validation
 - Flint-the-toolbox
 - Format-specific Implementations
- How we are using it
- Mini-demo

- Flint facilitates [file/format validation against a policy]
- the code centres on *individual file format modules* (pdf, epub, ..)
- Comes with a command line interface, GUIs and a hadoop mapreduce program

FLint – core features

The FLint ecosystem

How we are using it

- To deal with non print legal deposit

What's next

- Add additional format/feature modules (geospatial, etc..)

Mini-demo
